A Rugged, All-In-One Biometric Tablet

Chameleon 8 has been designed for a wide range of applications. It ensures effortless identification at borders, mobile checkpoints, and law enforcement scenarios. It can also facilitate voter registrations, verifications, and National ID registrations in remote regions.

Fast and Reliable ID Registration and Verification

Chameleon 8 is the ultimate solution for on-the-spot ID registration or verification. Equipped with multi-modal biometrics, a camera, NFC, and optional MRZ, it offers a comprehensive set of tools for secure and precise ID registrations, verifications, and document authentication. Its rugged casing ensures the device's resilience in challenging environments, while the user-friendly interface guarantees ease of use, even for non-technical individuals.

Chameleon 8
