**10 or 11**

## A Rich and Intuitive Peripheral Dashboard

An 11,6" display, FAP60 fingerprint scanner, contactless card reader, MRTD reader all work together for a quick and smooth enrollment.

## A Rich and Intuitive Peripheral Dashboard

The system incorporates five software controllable LED light panels positioned at the top, right, and left sides. The top light panel serves as an RGB status indicator, providing visual cues and feedback.

## High Quality Image Capture

### Motorised Automated Camera

The motorized camera is controlled by motors and mechanisms for position adjustment.

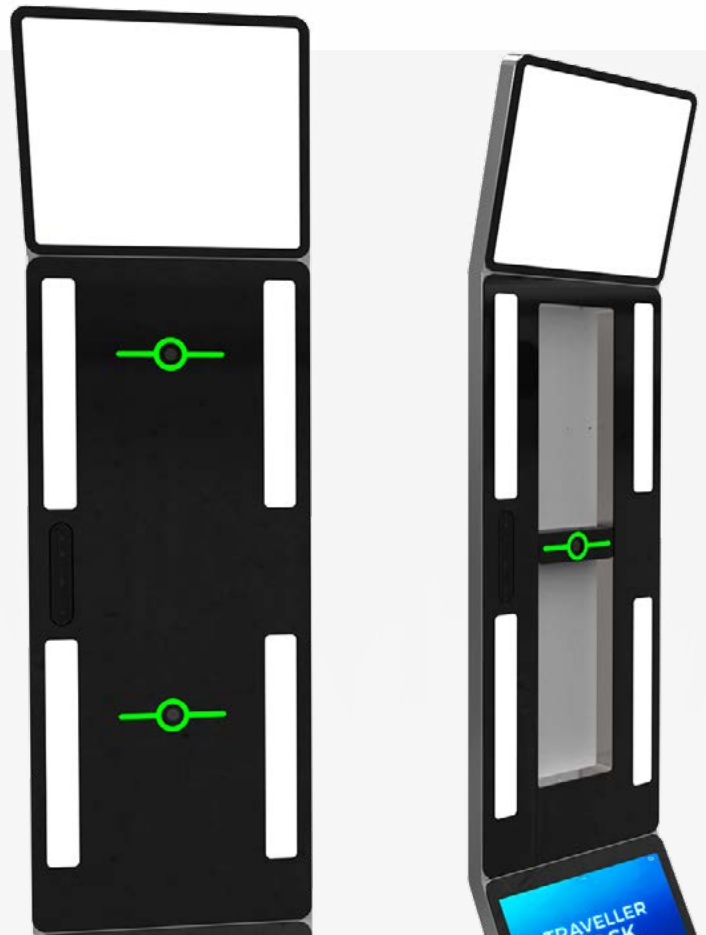

### Stationary Cameras

The static dual cameras utilise two cameras placed in a fixed position.

### 3D Face Tracking Camera

The 3D face tracking camera captures and tracks facial movements in 3D space.
